

Product information

Innoman HIGH Skin and Hand Disinfectant

150 ml	REF 1011D
250 ml	REF 1011E
500 ml	REF 1011G
1000 ml	REF 1011I

Characteristics

- Very good skin tolerance, dermatologically tested with the rating "very good"
- No colourings or perfume oils
- Very pleasant skin care system (innovative emollients)
- Extremely short application times with a wide spectrum of efficacy, based on polyalcohol
- Bactericidal, levurocidal, tuberculocidal and **virucidal** (for high-risk areas)
- With highly-purified ingredients, also licenced as a medical product in Germany

Product type

Skin-friendly disinfectant for application on the hands and on the skin. Within a very short time it provides a comprehensive spectrum of efficacy against bacteria incl. tuberculosis, candida albicans and all viruses such as HIV, HBV, HCV, flu viruses, incl. non-enveloped viruses (virucidal!)

Areas of application

Ready-for-use virucidal hand disinfectant with lipid-replenishing effect for the hygienic and surgical disinfection of hands.

Notes on application

For hygienic hand disinfection, rub the hands with 3ml of the solution and keep them moist for the application time stated below. For surgical hand disinfection, rub the hands and forearms with the solution and keep them moist for 1½ minutes. Always close the original container securely after use - dermatologically tested.

Composition

100g of the solution contains:

10g 1-propanol, 55.8g ethanol.

Expert opinion

Our products are scientifically examined and tested according to the latest methods. We will be happy to send you copies of our expert opinions on request.
